Turning Waste into Resources

Reduce,
Reuse,
Recycle

Sustainability in action

With waste materials ranking as a paramount environmental concern for everyone, Aqua Cure has proactively implemented a filter recycling service to recover and repurpose valuable components from used water filter cartridges.

We Have a Scheme to Reduce Plastic Waste...

How does it work?

We will recover recyclable filters. All the useful components that can be reused are recovered and the remaining plastic is turned into plastic pellets ready to be recycled into other plastic products.

Which Filters Do We Accept?

Filters contain many recyclable materials and as such, we're accepting all used Everpure® Claris, Claris Ultra and selected enviro+ filters*. We may also be able to help with the recycling of other manufacturer's filters. Site survey should list the recyclable products.
